What is euandi2019 and how does it work?

euandi2019 is a Voting Advice Application built to help citizens make an informed choice in the 2019 European Parliament elections. Available in over 20 languages, it invites users to react to 22 statements covering a wide range of contemporary policy issues and political values in European politics. The results show which parties stand closest to citizens' preferences, both in their country and all across Europe.

euandi2019 is part of a larger project on citizens' voting rights in Europe. See more at http://spaceu2019.eu/.

</table>

These results take into account the weights you may have given to the statements. By turning weights off, all answers will be given the same importance in the calculation of your overlap with the political parties.

Click on a political party's name to get a statement by statement breakdown of how that party is positioned relative to you.
This Radar graph shows the spectrum of political preferences on seven dimensions. You and the political parties have been mapped on this radar according to your positions. The farther from the center of the radar you or the political party is, the greater the support for that dimension.

Click on the check mark box next to the name of a political party in order to analyze its positions relative to yours on the Radar.
Economic liberalisation — Restrictive financial policy

Click on the check mark box next to the name of a political party in order to analyse its positions relative to yours on the Radar.

This Landscape graph shows your position relative to the political parties on a two dimensional ideological space. The horizontal axis maps the left-right economic dimension. The vertical axis maps a cultural dimension ranging from liberal/pro-EU stances to conservative/anti-EU stances.

NOTE: This Landscape only accounts for 2 dimensions of the political spectrum and is therefore less accurate in comparing your positioning to political parties relative to the alignment percentages and the Radar. Accordingly, you may not always be positioned on the Landscape closest to the party that most aligns with your statement positioning.
