The **Ease of Doing Business** 'distance to frontier' score assesses the overall level of regulatory performance of a country. It ranges from 0='lowest performance' to 100='the frontier', the best performance observed worldwide each year.

The **Human Development Index** (HDI) measures the average achievement in key dimensions of human development. It is based on life expectancy at birth, average duration of education and GDP per capita. It ranges from 0 to 100.

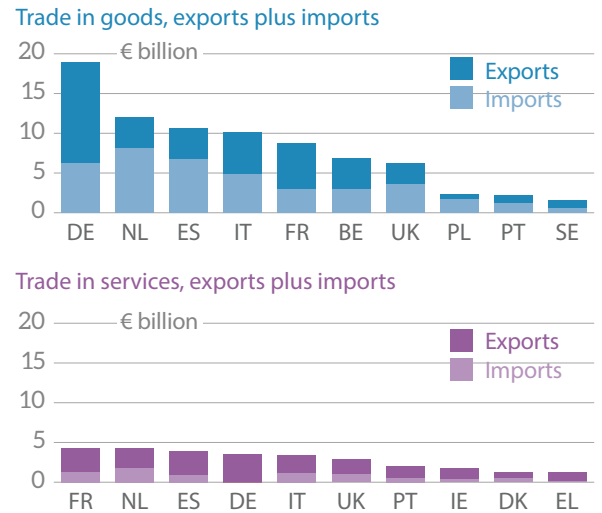

The **Corruption Perception Index** measures the perceived levels of public-sector corruption worldwide. Scores range from 0 (highly corrupt) to 100 (very clean). In 2017, two thirds of countries scored below 50.

The **GINI Index** measures the deviation of the distribution of income among individuals or households within a country from a perfectly equal distribution. It is hence a measure of inequality in income distribution. A value of 0 represents absolute equality, a value of 100 absolute inequality.
