Inflation rate

Remittances received (% of GDP)

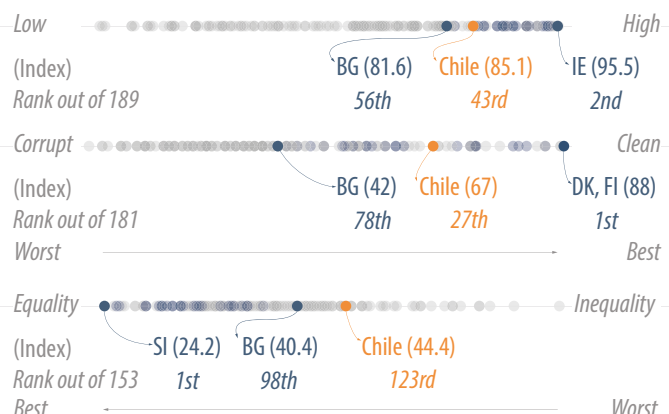

Chile's business environment and socio-economic indicators

The **Human Development Index (HDI)** measures average achievement in key dimensions of human development. It is based on life expectancy at birth, average duration of education and GDP per capita. It ranges from 0 to 100. 'High human development countries' (UN) are in the range between 70 and 80.

The **Corruption Perception Index** measures perceived levels of public sector corruption worldwide. Scores range from 0 (highly corrupt) to 100 (very clean).

The **GINI Index** measures deviation in distribution of income among individuals or households within a country from a perfectly equal distribution. It is a measure of inequality in income distribution. A value of 0 represents absolute equality, a value of 100 absolute inequality.

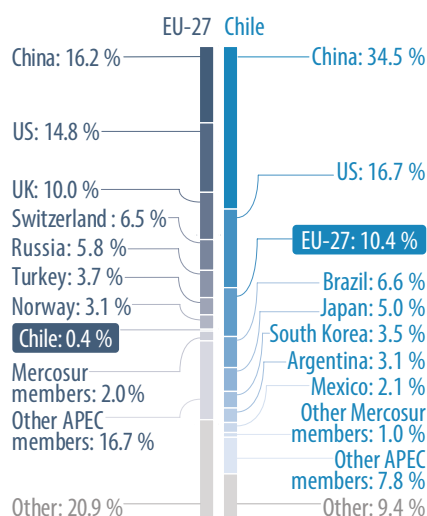

EU trade with Chile

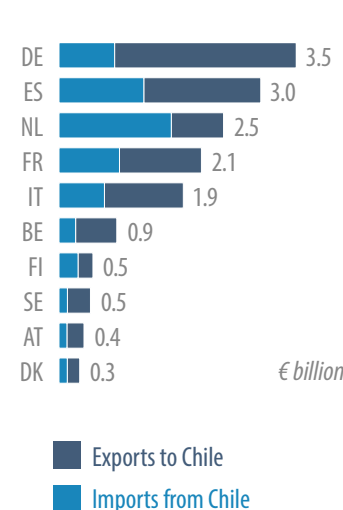

Main trade partners (2021)

Trade in goods, exports plus imports

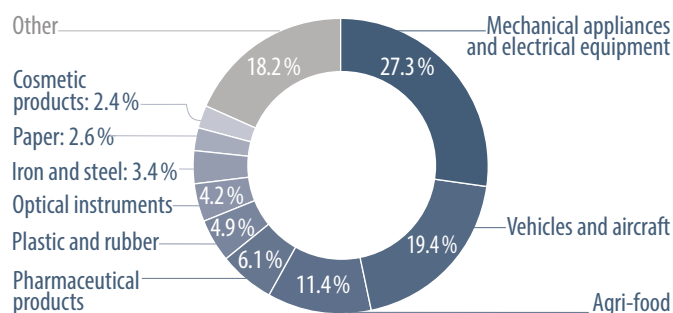

Top EU partners (2021)

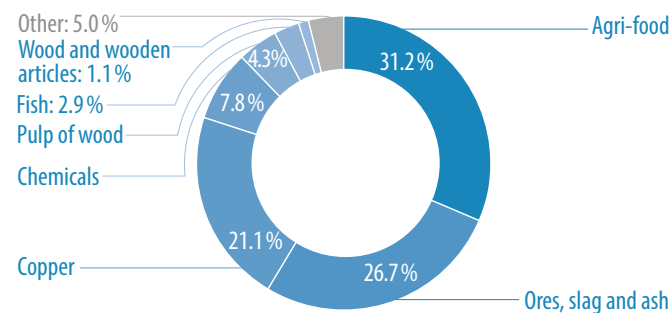

Trade in goods

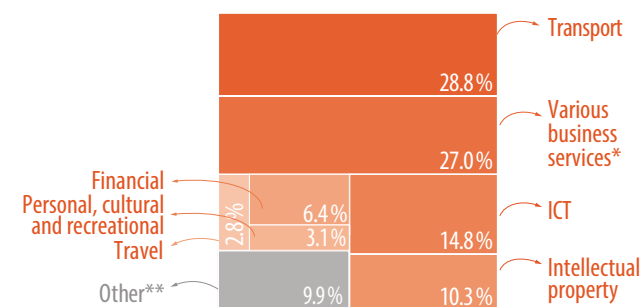

EU exports of goods to Chile (2021)
